

# Dr Nicholas Crump

**MBBS, FRACP**

Neurologist/Neurophysiologist

## Subspecialties

- Nerve conduction studies and EMG
- Neuromuscular conditions, peripheral neuropathies
- Multiple sclerosis

Greetings. I am happy to see patients with any neurological problems, but have particular interest and expertise in neuromuscular conditions, particularly peripheral neuropathies and myasthenia gravis, as well as multiple sclerosis.

To all General Practitioners and Specialist Consultants  
practicing in Melbourne's north

Dear Colleague,

I hope to be able to assist you with the management of your patients in the northern suburbs. I am a fully trained neurologist and neurophysiologist under the auspices of the Royal Australasian College of Physicians, having undertaken my neurology training here in Melbourne, with a fellowship in clinical neurophysiology and neuroimmunology (including multiple sclerosis) at the Austin Hospital. I am a graduate of the University of Melbourne.

I am commencing private practice at Epping Medical and Specialist Centre in addition to my rooms at East Melbourne, to complement my public hospital work. I am currently on staff at St Vincent's Hospital, but in 2010 I will be returning to the Austin Hospital, to work again in the Multiple Sclerosis and neuroimmunology clinic, as well as working in the neurophysiology department, where I will be involved in ongoing clinical research, as well as training neurophysiology fellows.

I am happy to see patients with any neurological problems, but have particular interest and expertise in neuromuscular conditions, particularly peripheral neuropathies and myasthenia gravis, as well as multiple sclerosis. I will also be performing routine nerve conduction studies and EMG, and am happy to see patients requiring both a consult and NCS/EMG in the same session (a "comprehensive neuromuscular consultation"), saving the patients both time and money, as I provide a discount to the patients if they require simultaneous clinical review and electrophysiological testing.

I look forward to your referrals.

Yours sincerely,

Dr Nicholas Crump MBBS FRACP
