

# One in nine will develop prostate cancer

Come and visit  
us on Open Day  
Saturday 24th October  
10am till 2pm

**While prostate cancer is a male disease, a diagnosis of prostate cancer will effect the lives of wives and partners, brothers and sisters, sons and daughters, grandchildren and friends.**

#### The facts:

- One in 9 men in Australia will develop prostate cancer in their lifetime.
- Prostate cancer is the most common cancer in Australian men.
- One man every three hours will lose his battle against this insidious disease.
- Each day about 32 men learn news that they have prostate cancer.
- Each year in Australia, close to 3000 men die of prostate cancer.
- Over 18,000 new cases are diagnosed in Australia every year.

**Epping Medical & Specialist Centre invites the Epping local community to a free comprehensive presentation on prostate cancer.**

- Prevention and lifestyle factors
- Screening tests
- Treatment
- Rehabilitation

The presenters are experts and will use their experience as doctors and physiotherapists to provide you with an informative update.
