To all General Practitioners and Specialist Consultants

Dear Colleague,

Firstly, I would like to thank you for taking the time out from your busy schedule to read my introductory letter. My name is Kenneth Leong, a graduate of Monash Medical School Victoria 1996. I did my residency at Monash Medical Centre Clayton Victoria before commencing my postgraduate training in Obstetrics and Gynaecology at the same hospital. I spent the last two years of my postgraduate specialist training at Box Hill Hospital Victoria before completing two preceptorship training courses in advanced laparoscopic surgery, firstly with Monash Endosurgery Unit and then with SWEC, two highly esteemed endosurgery units in the country. I subsequently went on to complete my advanced laparoscopic gynaecology training in minimally invasive surgery using the da Vinci Robotic Systems at Ohio Columbus USA in November 2007.

My surgical repertoire involves advanced laparoscopic resection surgery for endometriosis (Level 6), advanced laparoscopic myomectomy with conventional straight stick laparoscopic approach or using the da Vinci robotic system, advanced laparoscopic tubal reversal surgery and advanced laparoscopic conventional and robotic hysterectomy. Approximately ninety five percent of my gynaecology surgical cases are performed using minimally invasive approach.

I also have a keen interest in Infertility and IVF having worked under Professor Gab Kovacs and later on Dr. Bruce Downing before becoming part of the Monash IVF fraternity, now regularly seeing patients with Infertility problems and IVF needs. I particularly find it highly rewarding in managing patients with the infertility related surgical problems of endometriosis, PCOS, uterine fibroids and tubal blockages. The ability to manage these patients continuously from their surgery to the subsequent management of their IVF treatments provides some unique challenges but it also gives me immense satisfaction to see them coming through with success.

I look forward to being of assistance to you and your patients and would like to take this opportunity to thank you in advance for your kind support.

Warmest regards,

Dr. Kenneth Leong
